ALL AROUND SPORTS

PROFESSIONAL CRAFTSMANSHIP
IN FLOORING AND COVERING SINCE 1905.

HISTORY OF GRABO:

With more than 120 years of history, the company stands as a symbol of durability and professional tradition. Its philosophy is still defined by craftsmanship and a strong commitment to quality. The values set at the time of its foundation – such as reliability – continue to accompany the company's growth to this day, strengthening its identity and credibility.

MISSION & VALUES

When developing our products for the purpose of competitive or leisure sports, our primary concern was the maximum safety of the athletes and supporting outstanding athletic performance.

Our sports floors and sports parquet systems are designed and built to reduce stress on the athlete's skeletal system while providing a predictable, stable and even base for professional athletes.

The unique surface design provides a lasting, optimum grip required for changing direction and stopping quickly and safely.

CERTIFICATIONS AND GLOBAL PRESENCE

For our company, achieving international recognition and meeting certification standards is essential to ensure we can always offer our products in the highest quality.

That is why our products are certified by several international sports federations, including FIBA (basketball), IHF (handball), and BWF (badminton).

PARQUET SPORT FLOORS

Our sport parquet products are designed for both professional and amateur indoor sports activities.

They are applicable for gym halls used for training and competitions in team sports (primarily ball games), gymnastics, dancing and fitness. Functionality, safety, easy installation, and durability were the key aspects considered during the engineering of these products.

COMPETITION SPORT FLOORS

Our sports floors are developed with a strong focus on athlete safety and performance. They help protect the skeletal system, provide a stable base, and ensure lasting grip for quick, safe movements.

MEGA (10.3 mm)

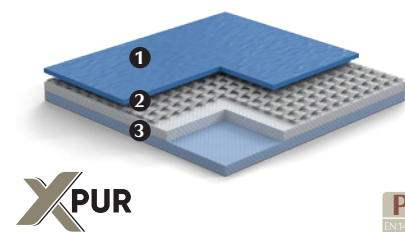

EXTREME (8.0 mm)

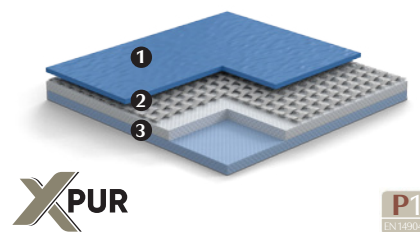

- 1 X-PUR Wear Layer
- 2 Glass Fiber Reinforcement
- 3 Combined Foam Backing

SUPREME (6.7 mm)

ELITE (6.0 mm)

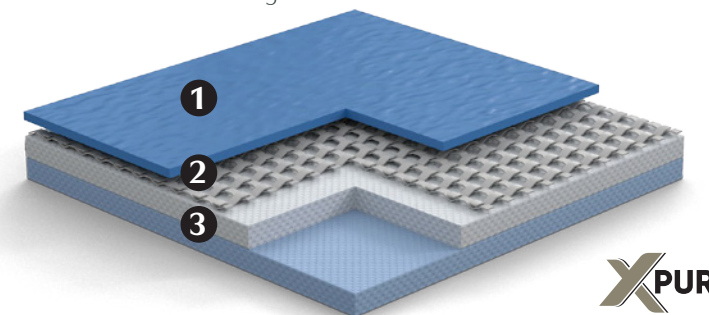

MULTIUSE PRODUCTS

VariUse 8.3 (8.3 mm)
VariUse 6.2 (6.2 mm)

- 1 X-PUR Wear Layer
- 2 Glass Fiber Reinforcement
- 3 Combined Foam Backing

The flooring in multi-purpose halls is suitable for various non-sporting activities while also satisfying the requirements of sporting events.

In addition to promoting safety and maximum athletic performance, the key factors in selecting these floorings are resistance to wear and dents as well as easy maintenance. This versatility is ensured by our specially designed, durable products that meet these requirements.

LEISURE SPORT AND SCHOOL SPORT HALLS

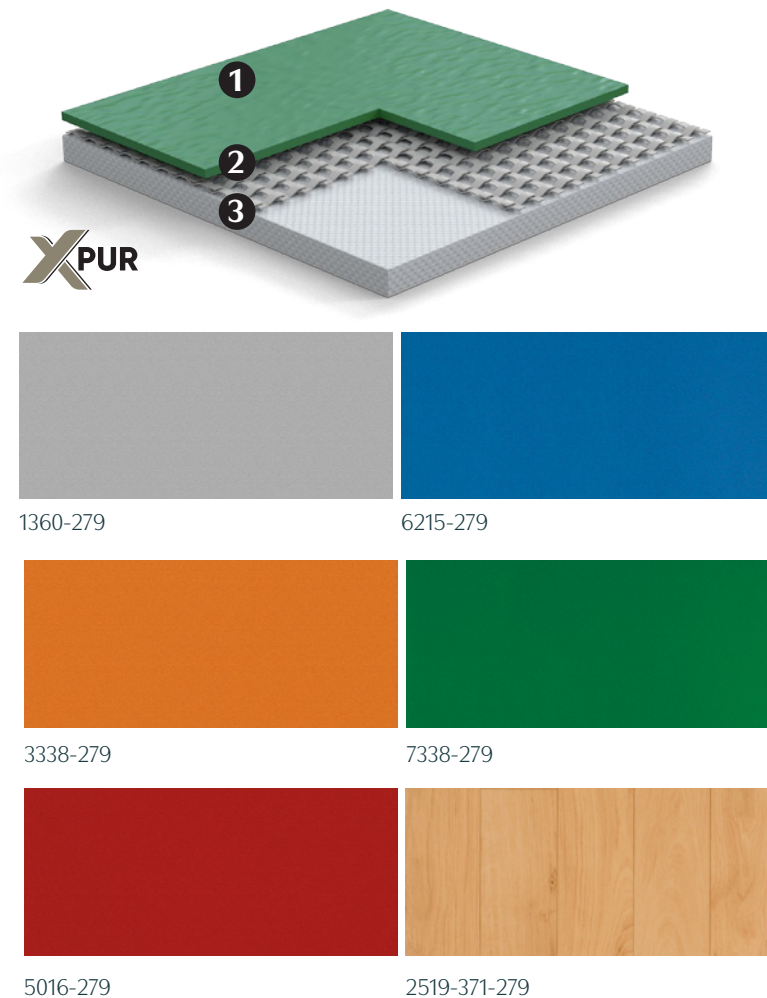

Our GYMFIT products are recommended for indoor use in leisure and school sports halls. These vinyl sports floors provide a durable, safe and aesthetically pleasing foundation for both competitive and recreational sports activities.

Apart from sports footwear, appropriate flooring plays a vital role in protecting knees, ankle joints and the back and the shock absorbing capacity of the flooring is particularly important for athletes with a developing or underdeveloped skeletal system, protecting the health of athletes, not only in the event of a fall.

GYMFIT 65 (6.5 mm)
GYMFIT 60 (6.0 mm)
GYMFIT 50 (5.0 mm)

- 1 X-PUR Wear Layer
- 2 Glass Fiber Reinforcement
- 3 Combined Foam Backing

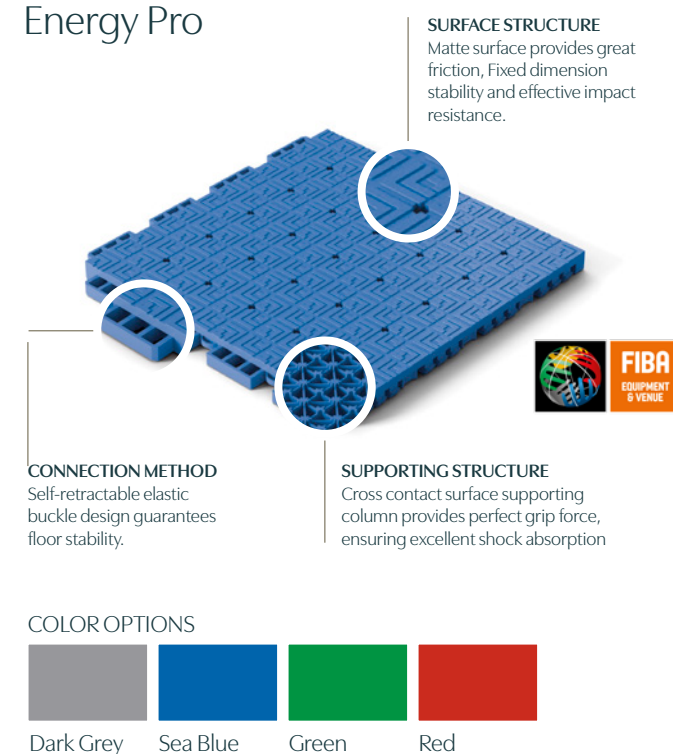

OUTDOOR SPORT FLOORS

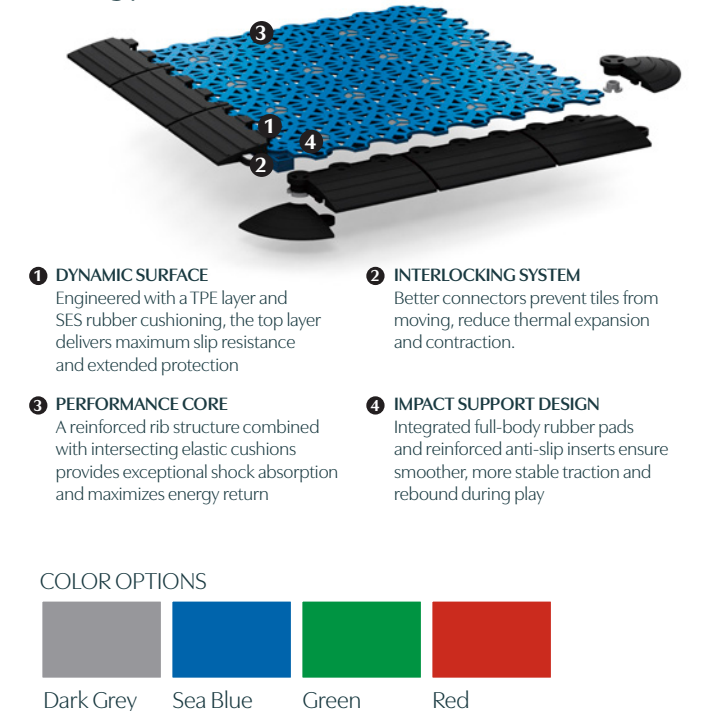

Graboplast has been dedicated to producing world class sports floors for over 40 years. We are proud of our prestigious heritage in sports and are continuing our tradition by introducing Grabo Energy modular sports floors.

Designed to deliver exceptional performance and durability, they can transform any outdoor space into a premium sports arena that will elevate any athlete's skills and enhance your sporting experience!
